Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-8, 11-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Macqueen et al. US 6,399,670.

2. Claims are rejected for reasons of record. Applicants have stated that the composition of Macqueen et al does not have the adhesive properties of the claims, and the presence of photoinitiator is required. (Applicants statement that the composition does have these properties is considered a typographical error). The adhesive properties of the composition would, of necessity, be present in order for the composition to adhere to a surface as taught in the reference. The term "adhesive composition" merely means that the composition must have some adhesive properties to some substrate. This the composition of the reference clearly possesses. The presence of photoinitiator in the reference is taught to be possibly very low, which reads on applicants' claims as defined by applicants' specification, or it would be prima facie obvious to one of ordinary skill in the art to substitute other forms of known curing mechanisms for these types of compositions, absent evidence of unexpected results commensurate in scope to the claims. The claimed compositions are, therefore, prima facie obvious to one of ordinary skill in the art.

3. This application contains claims drawn to an invention nonelected with traverse in the reply filed on 24 April 2006. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
